# Principais características de um SIG corporativo

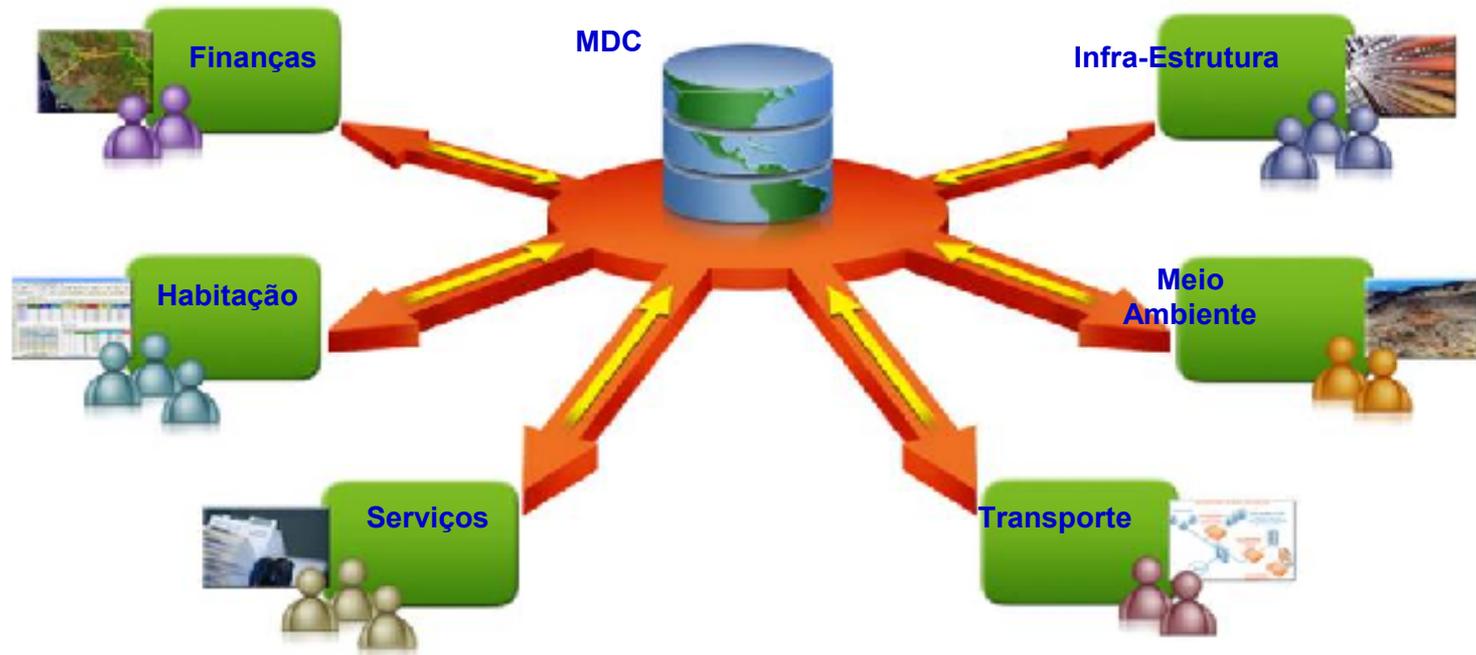

- Banco de dados corporativo;
- Segurança (distribuição dos dados para diferentes níveis de usuários);
- Flexibilidade (implementação de ferramentas para o atendimento de diversas demandas e diferentes estilos de trabalho dos usuários);
- Agilidade;
- Impede a divergência de informações;
- Economia de recursos;
- **Regras e processos claros e bem definidos** (normatização, metadados, IDE/INDE);
- Integração com outros sistemas.

## Geotendências

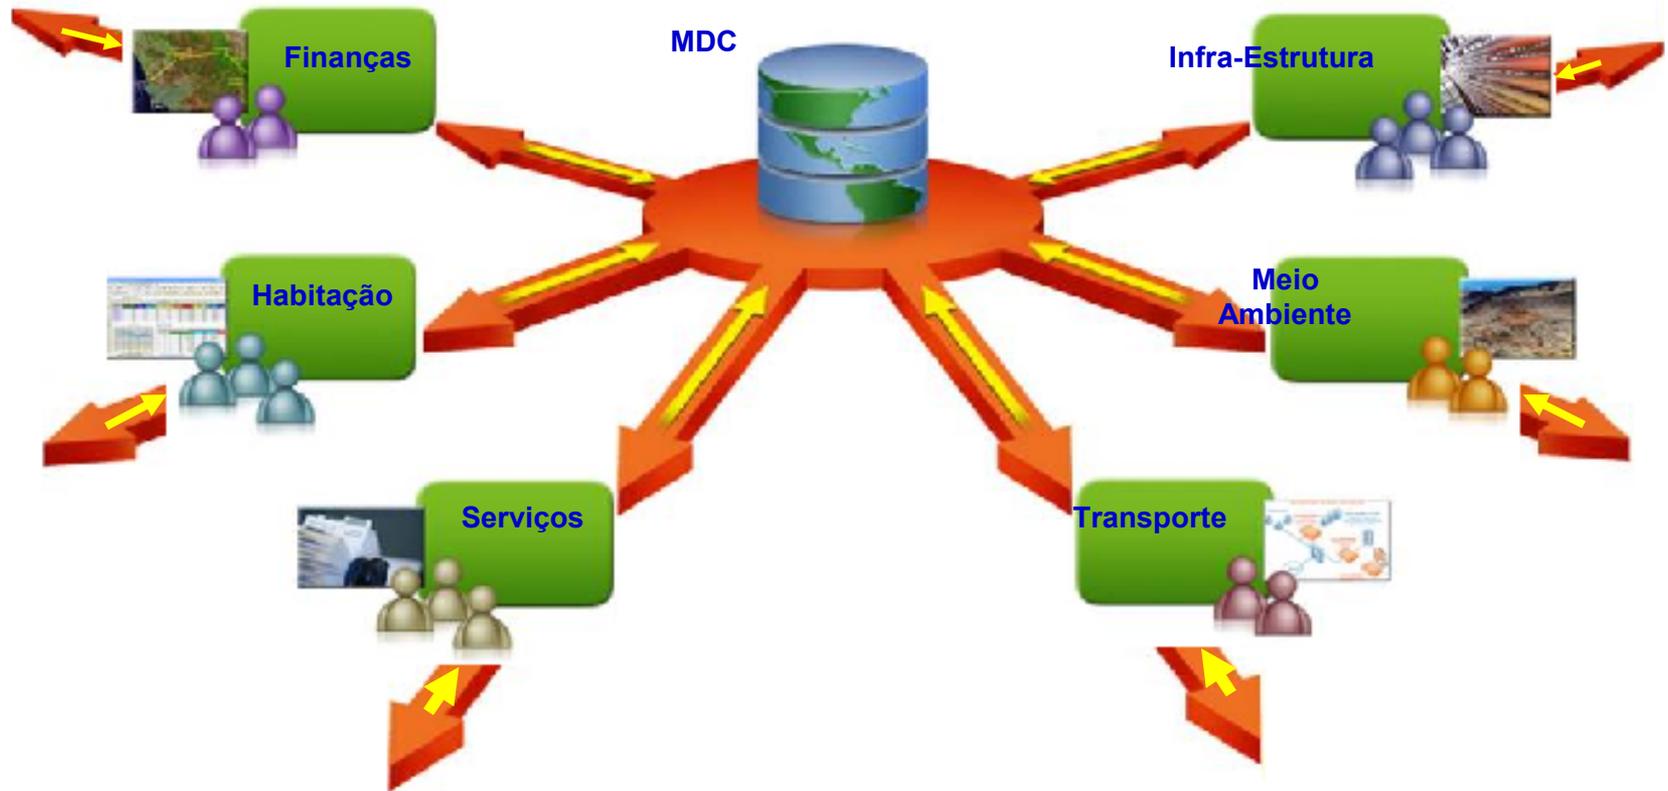

- Aplicações Web 
- Aplicações Desktop
- Administração centralizada 
- Geoserviços
- Colaboração 
- Liberdade 
- Sustentabilidade 

# Solução Corporativa

# Solução Corporativa

# GeoPortal

- Ambiente colaborativo;
- Facilita a implementação de uma IDE;
- Distribuição dos dados:
  - Acesso ao banco corporativo (publico interno)
  - Geoserviços: WMS, WFS (publico interno e externo)
  - Downloads; SHP, KML, DXF, etc...
- Distribuição de ferramentas
  - Web (roteirização, geocode, batch geocode, etc...)
  - Desktop (scripts, plugins, módulos, etc...)
- Comunicação  
Ex: Blog; Fórum de Discussão; Sistema de Ajuda em formato Wiki, possibilitando a participação dos usuários.

## Desafios

- Buscar o que existe de melhor;
- Aplicar a realidade da Cidade de São Paulo.
